EDUCATION

- Punjab University of Computing Information Technology** Lahore, Pakistan
Bachelor In Data Science December 2021 - June 2025
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Deepp Learning, Computer Vision
- Govt. Civil Lines College** Lahore, Pakistan
Intermediate In Compputer Science September 2019 - July 2021

SKILLS SUMMARY

- Languages:** Python, Golang
- Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, LangChain, OpenAI API, Flask, Selenium, Playwright, GoChi
- Tools:** Git, Docker, VS Code, Vercel, Postman
- Platforms:** Linux, Web
- Soft Skills:** Problem Solving, Communication, Time Management, Team Player

EXPERIENCE

- DatumBrain** Onsite
Associate Software Engineer(Full-time) May 2025 - Present
 - US Multi-State Data Processing & Analysis:** Collected, cleaned, and transformed multi-dimensional datasets across all 50 US states, handling diverse data points to ensure consistency, accuracy, and analytical readiness.
 - AI-Powered Chatbot & API Development:** Designed and developed multiple REST APIs and an AI chatbot using LangChain, implementing embeddings for intelligent query handling and contextual responses.
 - Web Scraping & Data Pipeline Automation:** Built automated web scrapers to collect large-scale datasets, processed and validated the data, and implemented automated uploads to Google Drive for storage and accessibility.

PROJECTS

- APPLY SMART – AI Resume Automation Tool:** Built an automated system to upload resumes, extract key information, filter jobs, and apply using personalized LLM-generated responses. Tech: Selenium, Tkinter, LangChain.
- Algerian Forest Fires Prediction:** Performed data cleaning, visualization, and regression modeling to predict fire occurrences; evaluated models using R^2 and MSE, and saved trained models using Pickle. Tech: Python, Pandas, Scikit-learn, Matplotlib.
- Bank Customer Churn Prediction:** Developed a deep learning model to predict customer churn and deployed an interactive Streamlit web application for real-time predictions. Tech: Python, TensorFlow, ANN, Streamlit.
- Holiday Package Prediction:** Built a machine learning model to identify potential customers for a wellness tourism package, improving targeted marketing and reducing campaign costs. Tech: Python, Pandas, Scikit-learn.
- Loan Default Prediction:** Analyzed loan default data using preprocessing, visualization, and machine learning models to predict default likelihood. Tech: Python, Pandas, Scikit-learn.
- Used Car Price Prediction:** Created a machine learning model to predict used car prices based on vehicle features, assisting sellers with competitive pricing decisions. Tech: Python, Pandas, Scikit-learn.
- Job Market Data Scraper:** Developed automated web scrapers to collect job listings from FlexJobs and Glassdoor, extracting structured job data for analysis and downstream processing. Tech: Python, Selenium, Playwright.

CERTIFICATIONS

- Complete Data Science, Machine Learning, Deep Learning NLP Bootcamp:**

TECHNICAL EXPERTISE

- Data Scraping using Selenium and Playwright from dynamic websites
- Data Cleaning, Transformation, and Manipulation using Pandas and NumPy.
- Exploratory Data Analysis (EDA) and Visualization using Matplotlib.
- REST API Development using Flask, Fast API.
- LLM-based Application Development using LangChain and Embeddings.
- Structured and Unstructured Data Handling with relational databases.
- End-to-End Data Pipelines including data collection, processing, and storage.
